**In the interest of product improvement, BEGA reserves the right to make technical changes without notice.**

**Tools Required:**
- Phillips medium screw driver
- 3 mm hex key
- Standard medium slotted screwdriver

**Protection Class:** IP65

**Weight:** 0.4 lbs.

**Notice to Installer for 33 200:**
1. BEGA luminaires may be damaged if connected to conduit systems containing water - Article 300-5G of National Electric Code requires that “Conduits or raceways through which moisture may contact energized live parts shall be sealed or plugged at either or both ends”.
2. Luminaire is Non-IC rated. Insulation must be at least 3" from luminaire.
3. Suitable for installation in hollow wall construction or poured concrete construction.
4. Back housing (BB2100LED) provided with (2) 7/8" holes (horizontal entry) for 1/2" trade size conduit.
5. Suitable for through wiring: max. of (4) No. 12 AWG conductors (plus ground) rated for 90°C.
6. LEDs are high-quality electronic components! Please avoid touching the light output opening of the LED directly during installation.

**BB2100LED - back housing installation in hollow (stud) wall construction:**
1. Install the (2) slotted mounting brackets provided as shown in Figure #1, using the (2) #6-32 wing nuts provided in the installation kit.
2. Adjust the brackets (by loosening the #6-32 wing nuts) so that the face of the back box will be flush to the finished wall surface after installation.
3. Connect conduit to back housing and pull wires for electrical connections to be made later.

**BB2100LED - back housing installation in poured concrete construction:**
1. Attach (2) #8-32 threaded rods into the pressed nuts located in the bottom of the fixture back box (Fig #3).
2. Attach the fixture back box to the concrete form using the wing nuts and washers provided in the installation kit (Fig #4).
3. Connect conduit to back housing and pull wires for electrical connections to be made later. Pour concrete. IMPORTANT NOTE!! DO NOT PUMP OR DROP CONCRETE DIRECTLY ON TOP OF THE BACK HOUSING.
4. After concrete is poured, remove the #8-32 wing nuts from the threaded rod before removing the form.

**33 200 - inner housing wiring and installation:**
1. Undo faceplate screws and carefully remove trim ring and lens.
2. Connect the corresponding positive and negative wires from the inner housing to the remote driver.
3. Place a small bead of silicone between edge of housing and wall to provide a seal.
4. Install inner housing into back housing, and tighten the (2) M3 screws until secure.
5. Install faceplate casting and lens. Make sure that gasket and lens are seated properly.
6. Tighten the (4) M4 flathead screws evenly to secure.

**Remote 25W LED Driver**
- 19 580

**Remote 50W LED Driver**
- 19 591

**Faceplate**
- 710813B

**Glass**
- 140515

**Gasket**
- 830887.1

**LED (3000K)**
- 74020
